EDUCATION

The Hong Kong Polytechnic University Major in Computer Science, Minor in Applied Mathematics, cGPA 3.61	<i>August 2022 - Present</i> <i>Kowloon, Hong Kong SAR</i>
Technical University of Denmark Summer Exchange	<i>June 2023 - August 2023</i> <i>Copenhagen, Denmark</i>
Yali High School Science Track, Nationwide College Entrance Examination top 0.5%	<i>September 2019 - June 2022</i> <i>Changsha, China</i>

RESEARCH INTERESTS

The interdisciplinary areas of Theoretical Computer Science, Computer Systems, Computer Engineering, Machine Learning, Economics, and Finance. I am currently familiar with Algorithmic Game Theory.

SKILLS

Programming Languages	Python, Java, C, C++, R, SQL, Shell Programming, \LaTeX
Software and Tools	Unix/Linux, Git, HTML, Relational Databases, Beamer, TikZ

HONORS

Dean's List of Outstanding Students 2023/2024 Issued by the Faculty of Engineering, The Hong Kong Polytechnic University	<i>September 2024</i>
HKSAR Government Scholarship Fund - Reaching Out Award 2022/23 Issued by the Education Bureau, Hong Kong Special Administrative Region	<i>August 2023</i>

EXPERIENCES AND PROJECTS

Undergraduate Researcher - Algorithmic Game Theory <i>Fortunately advised by Dr. Li Bo</i>	<i>April 2023 - Present</i>
--	-----------------------------

- Organized and examined an influential body of literature in recent years on the fair allocation problem.
- Investigated the existence of different fairness and efficiency notions including envy-freeness, Pareto efficiency, maximum Nash welfare, proportionality, maxmin share and their relaxed versions or approximation in various contexts of indivisible and divisible good/chore allocation including multi-agent, multi-round, budget-constrained, and randomized allocation.
- Concentrated on the proof and design of algorithms for the budget-constrained fair allocation problem and its combination with linear programming and downward-closedness.

Conference Student Assistant - IJTCS-FAW 2024	<i>July 2024</i>
--	------------------

- Assisted the organization of the International Joint Conference on Theoretical Computer Science - Frontier of Algorithmic Wisdom (IJTCS-FAW 2024) hosted by PolyU.

Technology Beyond Borders: Service-Learning in Da Nang, Vietnam	<i>January 2024</i>
--	---------------------

- Participated in the service-learning program co-hosted by PolyU and the Da Nang Architecture University in the Lý Công Un Primary School to promote STEM education and cultural exchange.

Image Low-Light Super-Resolution Enhancement with GANs <i>DTU 34269 Computational Imaging and Spectroscopy (Master level) project</i>	<i>July 2023</i> 🔗 Repository Link
---	---

- Developed a system with PyTorch to enhance poorly lit images into well lit images with high resolution using a GAN architecture with discovery on reliable generators, discriminators, and loss functions.

PolyU Computer Science Course Projects <i>A series of programming projects of PolyU COMP subjects</i>	<i>December 2022 - Present</i> 🔗 Repository Link
